

Meeting Minutes – Practical Exercise 7 (Linear Regression)

Date:	April , 1st, 2026
Meeting Mode:	Online Discussion
Course:	BBT 3201 – Artificial Intelligence
Topic:	Practical Exercise 7: Prediction using linear regression

Members Present

1. 136532 Peter Maina
2. 136345 Jeff Kioko
3. 121353 Samuel Brian
4. 120751 David Mwangi

Key Discussion Points

- Reviewed requirements for Practical Exercise 7 and dataset from Kaggle. - Agreed on notebook structure with each question in a separate cell.
- Discussed on the relevant data cleaning method
- Used the linear regression algorithm to determine the price of diamonds given all other features of carats.
- Created a new model 'diamond model that would enable the prediction of the prices
- Assigned GitHub workflow: repository creation (Data-Wrangling) and forking by all members. - Agreed to include meeting minutes as evidence of group collaboration.
